A full-scope IT system gives you a competitive advantage by delivering security, availability, agility and flexibility as well as compliance and business continuity.

But how do you implement such a solution, built around your business's individual needs, without adding to the burden of maintaining a more sophisticated IT infrastructure with incredibly high upfront costs?

The answer is to remove the burden entirely and take full advantage of all the worry-free benefits having an "online" system brings with it.

With XC360's bespoke cloud services, you can stake your business reputation on ours with guaranteed delivery of:

- A secure, compliant cloud platform built for your business.
- 24*7*365 sophisticated proactive monitoring.
- Access to your business from wherever and whenever you need to.
- Applications, documents, spreadsheets, email (your entire business) available in one place.
- Services that can be adapted as you need and a platform that can evolve with your business.
- Integrated data backup and data protection solutions that don't fail.
- Business continuity designed around your optimal RTO timeframes.
- Availability guarantees that mean it will work when you need it to and even when you don't!
- Worry free IT services that help you compete with the industry giants.
- Fully supported and managed so you never need to worry about configuring and maintaining your IT.
