

## Protecting Your Data is as Easy as Backup, Search & Restore

### Automated backup of cloud application data with AirGap technology

- Backup Exchange Online, OneDrive, SharePoint, and Teams
- Backup of Google Workspace Contacts, Calendar, Gmail, Sites, Drive, and Shared Drives
- Automatic discovery and backups multiple times daily to our Secure Cloud with AirGap technology

### Instant full-text search and granular/mass restores

- Instant full-text search for point-in-time restores of Microsoft 365 and Google Workspace data
- Rich document search filtering including title, owner, created date, modified date, and folder
- Rich email search filtering, including sent date, received date, label, sender, recipients, subject line, keyword, attachment names, and within attachments

### Compliance

- Multi-factor authentication governing all users
- Inability to delete/purge data from within Cloud Backup
- Detailed dashboards, reports, and monitoring of all system, user, and backup activities with detailed backup diagnostics and intuitive remediation workflows
- The most comprehensive and complete regulatory compliance in the industry including:
  - HIPAA
  - SOC-2
  - GDPR

## You standardized on Microsoft 365 or Google Workspace, so your data is safe in the cloud. Or is it?

More than 30% of small businesses have migrated on-premise Microsoft Exchange servers to Microsoft 365 in the cloud, and the trend is accelerating. Increasing numbers continue to adopt Google Workspace. However, there are many things most small businesses don't know about these vendors:

1. Microsoft provides no guarantee against data loss and only retains data for 14 days after deletion.
2. Google provides no guarantee against data loss and only retains data for 20-25 days after deletion. The optional Google Vault does not retain data from Calendar, Contacts, Sites, and Shared Drives.

Per Microsoft, one of the most common security support requests is for assistance remediating account compromise. The vendors limited retention can violate compliance requirements in many industries, and disrupt companies when data is lost. Having your backups fulfilled through a third party is a critical part of a healthy disaster recovery plan, otherwise when the source system is compromised, so are your backups. We give you peace of mind knowing your organization's data is always available for as long as you need it with AirGap and truly unlimited storage and retention. We're on a mission to cure data loss.

# Data Loss Happens. Even In The Cloud.

Can your organization afford to lose important emails, contacts, calendars, and work documents?

XC360 Backup solution ensures all your Microsoft 365 and Google Workspace data is securely backed up, recoverable, and protected.

# Avert Common Data Disasters

## Ransomware

Ransomware is an unfortunate reality for many organizations. If your Microsoft 365 and Google Workspace Data is ever encrypted, our solution allows you to restore pre-infected data to a new domain, having you up and running in just minutes.

## Data Loss

Your data is backed up to our Secure Cloud with AirGap technology, which ensures your data will always be there. The inability to delete data from within Cloud Backup matched to unlimited storage and unlimited retention, organizations can rest assured that their Microsoft 365 and Google Workspace data is never lost with us.

## Buried Data

Often times we need to find data associated to a particular person or event that spans over a long time period and across all Microsoft 365 or Google Workspace channels. With SmartSearch, your organization can perform complex search queries to identify and retrieve data. SmartSearch function allows you to search for historical data and restore — just two steps!

## Prevent Data Disasters

User error, flawed data migrations, and more can wreak havoc on your Microsoft 365 and Google Workspace information. Our solution guarantees anytime access to critical Microsoft 365 and Google Workspace data.

## Never Experience Downtime

Cloud-to-cloud backup for Microsoft 365 and Google Workspace makes it easy to find your critical emails, contacts and calendar data. Cloud data can be rapidly restored to any application or user.

## Your Privacy Matters

We take the security of your data as seriously as you do. Our solution features military-grade encryption: 128-bit SSL in transit and 256-bit AES at rest. Access is always verified, logged, and protected through multi-factor authentication.

## Keep Tabs on Your Data

We provide a comprehensive overview of backups, including a dashboard for seamless navigation of your organizations data.
